**As pet parents,
we all want our furry
friends to feel Fresh
and comfortable,
that's where
Paw Smooth Comes in.** 

99% ingredients
are of natural
and vegan
origin.

Paw Smooth™ 

what's inside?

Tulsi (Holy Basil)

Tulsi acts as a natural antiseptic and has potent antibacterial and antifungal properties, helping to prevent infection in cuts and wounds. It also reduces swelling and promotes faster healing by enhancing the skin's natural defense mechanism.

Aloe Vera

Aloe Vera is widely known for its soothing and moisturizing qualities. It provides instant relief for inflamed or irritated skin and promotes healing by increasing collagen synthesis. Its antibacterial properties also help prevent infection, making it ideal for wound care.

Calendula

Calendula is celebrated for its anti-inflammatory, antiseptic, and regenerative effects on the skin. It speeds up wound healing by boosting tissue repair and stimulating the production of new skin cells, while reducing redness and swelling.

Rosemary

Rosemary's antioxidant and anti-inflammatory properties help reduce swelling and discomfort. It supports wound healing by promoting skin regeneration and improving blood circulation, helping to clear damaged cells and introduce nutrients to the affected area.

The Paw Smooth Wound Healing Spray is a natural, pet-safe solution designed to promote rapid healing of minor cuts, scrapes, and skin irritations. Its soothing formula helps prevent infections, reduces inflammation, and supports the regeneration of healthy skin.

This spray provides a protective barrier, ensuring that wounds stay clean and moisturized, allowing for faster recovery and minimizing discomfort. Perfect for daily use on minor wounds, rashes, or irritations, it ensures a gentle yet effective healing process, keeping your pet comfortable and protected.

Oatmeal

Oatmeal is excellent for soothing irritated skin and calming inflammation. It forms a protective barrier on the skin, shielding the wound from external irritants while moisturizing the area to prevent dryness, which can slow down healing.

Turmeric

Turmeric is a powerful anti-inflammatory and antibacterial herb that accelerates wound healing by reducing swelling and fighting infection. Curcumin, its active compound, also helps to improve tissue regeneration and reduce scarring.

Echinacea

Echinacea has immune-boosting and antimicrobial properties that help the body fight off infections more effectively. It promotes tissue repair and skin regeneration, making it useful for treating minor cuts, scrapes, and other wounds.

How to use

Spray directly on affected areas 2-3 times daily.
Safe for all pets.
