PAWSMOOTH PawButter is made from a blend of natural, pet-safe ingredients. It is designed to provide intensive care for your pet's paws and nose.

This cream is crafted to serve a dual function, effectively moisturizing and protecting both the paws and nose of our pets. It forms a protective barrier against harsh environmental conditions, such as extreme temperatures, rough terrains, and chemical irritants.

How to use

Clean the Paws Before applying, ensure your pet's paws are clean and dry. Use a damp cloth or pet wipe to gently remove dirt and debris from the paw pads.

Apply the Paw Butter Scoop a small amount of the cream and rub it between your fingers to warm it up. Gently massage the cream onto the paw pads, focusing on any rough or cracked areas.

Let It Absorb Allow the cream to absorb into the skin. This may take a few minutes, so keep your pet occupied or give them a treat during this time.

Use Regularly For best results, apply 2-3 times a week or daily for pets with particularly dry or cracked paws, especially after walks, during dry weather, or in cold climates.

Safe for Licking Don't worry if your pet licks their paws after application—our cream is made with natural, pet-safe ingredients.
